DECISION LAYER · OBSERVED FACTS → RECOMMENDED ACTIONS

From Data Insights to Business Decisions

Observed in the data

Sales momentum: March 2026 is the strongest complete month at $13,776.82; April is partial through April 7. **Customer concentration:** Seniors lead revenue at $27,988.66 and customer count at 180. **Menu concentration:** Bakery contributes $43,143.14; the Chocolate Old-Fashioned Doughnut leads revenue and quantity.

Recommended business moves

Plan: Focus on strong stores and complete-month patterns to guide staffing, inventory, and promotional cadence; use transaction patterns for replenishment and promotion planning. **Retain:** Build targeted senior retention and engagement while keeping growth programs distinct for younger segments. **Menu:** Feature high-performing bakery and breakfast items; investigate weaker items before menu changes.

WORKFLOW

Clean — Python EDA & cleaning → Analyze — PostgreSQL SQL analysis → Communicate — Power BI dashboards → Act — Replenishment and promotion planning

Python, PostgreSQL, and Power BI combine cleaning, analysis, and communication into a repeatable business intelligence workflow.
